Re: Waste Water Treatment Plant

Upon observation of the WWTP plant by myself and other staff it was noted that the plant had some issues. There were some repairs that needed to be made and the overall condition of plant needed some TLC. As I started talking with different resources including Rural Water Association and other contractors the current operator came to me and submitted his resignation for the end of May. Currently Stokes County Public Works does not have a Grade 2 license operator. Pace Analytical which was formally R and L Labs and once operated the plant has agreed to operate the plant for the next fiscal yr. This will include 5 site visit per week and all water sampling and labs for the amount below.

\$5,711 per month
