Re: Approval of Water Tower Site

From: Shannon B. Shaver, Interim County Manager

Date: November 2, 2021

As you are aware the site on Wall Loop Road has been identified as the most favorable for the elevated water storage tank by LKC Engineering as part of the Stokes-Danbury /Meadows Water System Interconnection Project. This site has been selected due to the location and elevation providing the County a better opportunity to extend water service to the west in the future. The total projected height is 175 ft. and will hold approximately 100 gallons of water. Stokes County owns this property and the public hearing requirement has been satisfied with very little opposition. Attached on the agenda is the map of the property along with the address information requested from Stokes County Mapping/GIS. I am requesting formal approval from the Board of Commissioners of 2320 Wall Loop Road as the site for the Water Tower.

A handwritten signature in cursive script, reading "Shannon B. Shaver".
